

## Problem Report Format

A problem report consists of two sections: the header and the stack trace.

The header displays the message from the unhandled exception as a paragraph where the text is bold. The exception message should be prefixed with `Problem:` .

The stack trace displays the stack trace from the unhandled exception as a preformatted code block.

## Sample Problem Report Format

```
<p style="font-weight: bold;">Problem: running the ProblemReporterDriver</p>
<pre>
java.lang.RuntimeException: running the ProblemReporterDriver
    at com.valuablecode.integration.ProblemReporterDriver.main(ProblemReporterDriver.java:14)
</pre>
```
